Venkata Ramakrishna Mandalemula

FRONTEND DEVELOPER

USA | (937) 809 1812 | ramakrishnamandalemula3@gmail.com

PROFESSIONAL SUMMARY

Frontend Developer with 4 years of experience building responsive, accessible, and scalable enterprise web applications using React.js, JavaScript (ES6+), HTML5, and CSS3. Experienced in component-based architecture, API Integrations, OAuth 2.0, performance optimization, and WCAG accessibility. Proficient in unit and component testing using Jest and React Testing Library, with hands-on experience in Figma-driven UI development and AI-assisted workflows for accelerating design-to-React implementation.

SKILLS

Front-End Technologies	React.js, JavaScript (ES6+), HTML5, CSS3, React Hooks, Redux, Context API, Material UI, Responsive Web Design, Component-Based Architecture
API & Integration	REST APIs, Microsoft Graph API, OAuth 2.0, JSON, Async/Await, Promises
Testing	Jest, React Testing Library, Unit Testing, Component Testing
Accessibility & Compatibility	WCAG 2.1 AA, ARIA, Semantic HTML, Keyboard Navigation, Screen Reader Compatibility, Cross-Browser Compatibility
UI/UX & Design	Figma, Wireframing, Prototyping, User Flows, Usability Testing
Performance	Lazy Loading, Code Splitting, Memoization, Front-End Performance Optimization
AI-Assisted Development	Generative AI, Prompt Engineering, AI-Assisted Code Generation, Figma-to-React Workflows
Tools & Methodologies	Git, GitHub, Jira, npm, Webpack, Chrome DevTools, Agile/Scrum

EXPERIENCE

Software Developer (Frontend) | IBM, USA **Oct 2024 – Present**

- Developed and enhanced the IBM TRIRIGA Room Reservation web application using React, JavaScript (ES6+), HTML5, and CSS3, delivering 20+ features and UI enhancements for enterprise meeting room and workspace reservations.
- Designed and implemented advanced search, filtering, and intuitive navigation for room discovery based on building, floor, capacity, amenities, and availability, improving booking efficiency and user experience.
- Built and maintained 25+ reusable React components supporting recurring reservations, modifications, cancellations, room and workspace scheduling, improving code reusability and accelerating feature delivery.
- Integrated the application with Microsoft Outlook Calendar using the Microsoft Graph API and OAuth 2.0 authentication, enabling real-time calendar synchronization, automatic meeting updates, and reducing scheduling conflicts.
- Enhanced accessibility and performance through WCAG 2.1 AA, ARIA, keyboard navigation, memoization, lazy loading, and code splitting, improving application responsiveness by approximately 25–35%.
- Developed unit and component tests using Jest and React Testing Library, validating user interactions, component behavior, and edge cases while improving regression coverage and release reliability.
- Contributed to an AI-assisted Figma-to-React initiative that generates product-aligned React interfaces from design prompts by contextualizing AI with product architecture, coding standards, reusable components, dependencies, and build/deployment workflows.
- Collaborated with Product Managers, UX Designers, Backend Engineers, and QA teams in Agile/Scrum to deliver features, conduct code reviews, resolve production issues, and support IBM TRIRIGA IWMS releases.

Frontend Developer | **Emonics, USA** **Jun 2024 – Oct 2024**

- Delivered key features for an Employee Service Portal using React, JavaScript (ES6+), HTML5, and CSS3, providing employees a centralized interface to submit requests, manage profiles, and track service updates.
- Created interactive dashboards and dynamic forms using React Hooks and Redux for state management, with client-side validation, search, filtering, and conditional rendering to simplify employee self-service workflows.
- Integrated REST APIs to retrieve and update employee and service-request data, implementing asynchronous operations, loading states, error handling, and user notifications for reliable interactions.
- Resolved UI defects and improved responsive behavior across desktop and mobile devices while contributing to feature testing, debugging, Git-based code reviews, and Agile sprint deliveries.

Software Developer | **DXC, India** **Jan 2021 – Jul 2022**

- Developed responsive interfaces for an Insurance Claims Portal using React, JavaScript, HTML5, and CSS3, supporting claim submission, document management, status tracking, and customer communication.
- Created 15+ user flows, wireframes, and interactive Figma prototypes, translating business requirements into intuitive designs and accelerating design validation.
- Incorporated user and stakeholder feedback from usability reviews to streamline multi-step claim workflows, reducing unnecessary navigation by approximately 20%.
- Built 20+ reusable React components for claim forms, document uploads, status timelines, dashboards, and notifications, improving UI consistency and development efficiency.
- Resolved 40+ UI and functional defects while ensuring responsive design and cross-browser compatibility through collaboration with development, design, and QA teams in Agile releases.

EDUCATION

Master of Science in Computer Science **Aug 2022 – May 2024**

University of Dayton, Ohio, USA

Bachelor of Technology in Information Technology **Aug 2016 – Sep 2020**

Vignan's Institute of Information Technology, Andhra Pradesh, India
